DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: pages 2 and 3 state "soup-water bowl". This should be corrected as "soap".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "the clothing" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Probst (US Patent No. 3,762,870).

Probst discloses a cleaning system having a motorized wheel brush (Fig. 1, Item 12), a matching pressure roller (Fig. 1, Item 5) and a pressure adjustment assembly (Fig. 1, Item 20; col. 4).

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Whitt (US Patent No. 5,159,734).

Whitt discloses a cleaning system having a motorized wheel brush partially submerged in cleaning solution (Figs. 2 and 3) and a container for cleaning solution agents placed under the wheel brush (Fig. 2; see also entire document). The intended uses of the cleaning apparatus "for stubborn stains" and "to distribute the cleaning solution to the brush and clothing" are not given weight. As long as the apparatus is capable of performing the intended use, the prior art reads on the claims. In this case, Whitt's apparatus has the same structure as applicant's claimed invention and would be capable of removing stubborn stains and distributing cleaning solution to the brush and clothing.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art not referred to are Hasselschwert (US 4095443), Schiffers (US 4406139), Thumm (US 5477584) and Friedrichs (US 5802976), who teach cleaning apparatus with rollers.
